# The global and national challenges to collect data and set benchmarks on gender equality in and through education

**Manos Antoninis**

Director, Global Education Monitoring Report  
UNESCO

## **2024** CONFERENCE ON **EDUCATION DATA AND STATISTICS**

**Comparable data on gender equality in SDG 4 monitoring:  
Challenges and opportunities**

**High-quality data on gender equality in and through education**

**Manos Antoninis, Director, Global Education Monitoring Report**

# Gender equality indicators in SDG 4 monitoring

---

All global indicators in targets 4.1-4.6 are disaggregated by sex (with two exceptions, by mistake: 4.1.2 on completion and 4.4.1 on ICT skills) while 4.5.1 doubles the emphasis on gender parity indices for all indicators

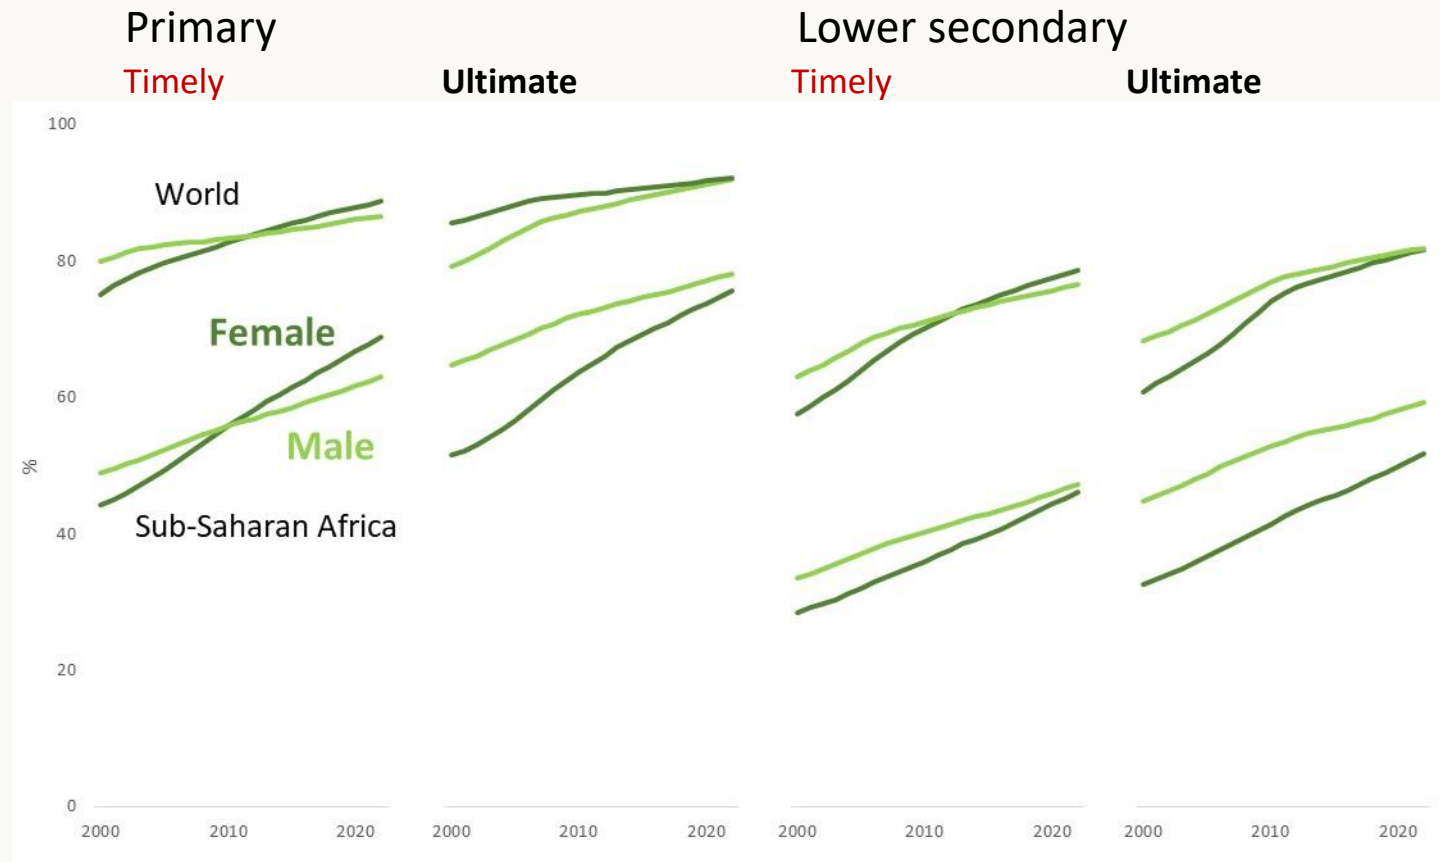

Gender dimensions in other indicators:

- ▶ 4.7.2 on schools that provide sexuality education
- ▶ 4.a.1 on schools with sex-specific sanitation facilities
- ▶ 4.a.2 on students experiencing bullying

Many more indicators could be measured but there are constraints:

- ▶ Need to be comparable
- ▶ Need to be, preferably though not necessarily, collected by countries

# Inequality dimensions indicators miss Timeliness of completion

Completion rate by sex and time, Africa and world, 2000–22

**VIEW**

# Inequality dimensions indicators miss Timeliness of completion

**Completion rate by sex and time, Africa and world, 2000–22**

**VIEW**

# Inequality dimensions indicators miss Intersecting characteristics

Young women even less likely to attend school in **rural** areas in most countries

## Gender parity index in upper secondary school age attendance rate

# Inequality dimensions indicators miss Interpretation of learning gap

Girls outperform boys in practically every country  
**Female-male gap in students with minimum proficiency (percentage points)**

# Inequality dimensions indicators miss Interpretation of learning gap

...but the meaning of this gap is debatable!

## Comparison of gender gaps in reading, PISA and PIAAC

# Inequality dimensions indicators miss Measure of learning proficiency

Girls lag behind boys in maths in early grades and catch up by end of primary

**Up to grade 4**

**Above grade 4**

# Inequality dimensions indicators miss Measure of learning proficiency

.....but are doing worse at the top end of performance

**Minimum proficiency**

**Advanced proficiency**

# Benchmarks in the 2030 Agenda

---

'embrace a culture of shared responsibility, one based on ... **benchmarking** for progress'

UN Secretary General Synthesis Report (§146), 2014

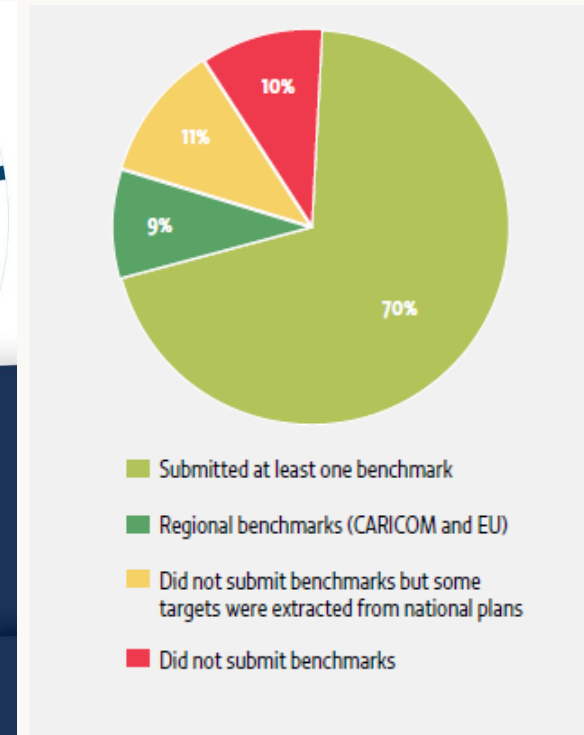

'establish appropriate intermediate benchmarks for selected SDG indicators, that are indispensable for addressing the accountability deficit associated with longer-term targets'

Education 2030 Framework for Action (§28), 2015

We request UNESCO and its partners, together with the SDG-Education 2030 Steering Committee, to ... propose relevant and realistic benchmarks of key SDG indicators for subsequent monitoring

Global Education Meeting (§10), 2021

# Eight in ten countries have now set benchmarks

# Eight benchmark indicators

Thematic area	Indicator			Disaggregation
Early childhood	Global Indicator 4.2.2	Participation rate one year before primary	1	
Basic education	Thematic Indicator 4.1.4	Out-of-school rate	3	(b) Primary school age (c) Lower secondary school age (d) Upper secondary school age
	Global Indicator 4.1.2	Completion rate	3	(b) Primary (c) Lower secondary (d) Upper secondary
	Related to global indicator 4.5.1	Gender gap, completion rate in upper secondary	1	
	Global indicator 4.1.1	Minimum learning proficiency in (i) reading and (ii) mathematics	6	(a) Early primary grades (b) End of primary (c) End of lower secondary
Digitalization	Global Indicator 4.a.1	Schools connected to the internet	3	(a) Primary (b) Lower secondary (c) Upper secondary
Quality	Global Indicator 4.c.1	Trained teachers	4	(a) Pre-primary (b) Primary (c) Lower secondary (d) Upper secondary
Financing	Global Indicator 1.a.2 and Education 2030 benchmarks	Education expenditure	2	(a) As share of total public expenditure (b) As share of gross domestic product

**36%** of countries have submitted a national SDG 4 benchmark for the gap indicator

If countries achieved their national (or feasible) benchmarks, indicator the gap would fall from **3.2 to 0.7 pp** in favour of girls

# Actual progress

- ▶ About **27%** of countries do not have data
- ▶ Countries which started with a **girls'** disadvantage are moving towards parity albeit they are progressing slower than their commitment
- ▶ Countries which started with a **boys'** disadvantage are moving off track

# Challenges

## – but solutions and Conference recommendations?

---

- ▶ **Is the gender gap the right benchmark indicator for (gender) equity?**
  - Yes, it is simple to understand, relevant for policy and data rich
  - ...but aspects of timely completion need to be addressed
- ▶ **Are countries using the same data sources?**
  - There is still some confusion between administrative and survey sources
- ▶ **Are actual data better than estimated data to monitor progress?**
  - There is a lot of uncertainty year-on-year as with all administrative data (i.e. population data come from a different source)

# MINISTRY OF EDUCATION & YOUTH

## GENDER GAP IN UPPER SECONDARY COMPLETION RATES

PREPARED BY  
PHILLIPA LIVINGSTON  
SENIOR STATISTICIAN  
JAMAICA

# Background

Secondary Level

01

- Primary and Junior (grades 1-9)

02

- Secondary High (grades 7-13)

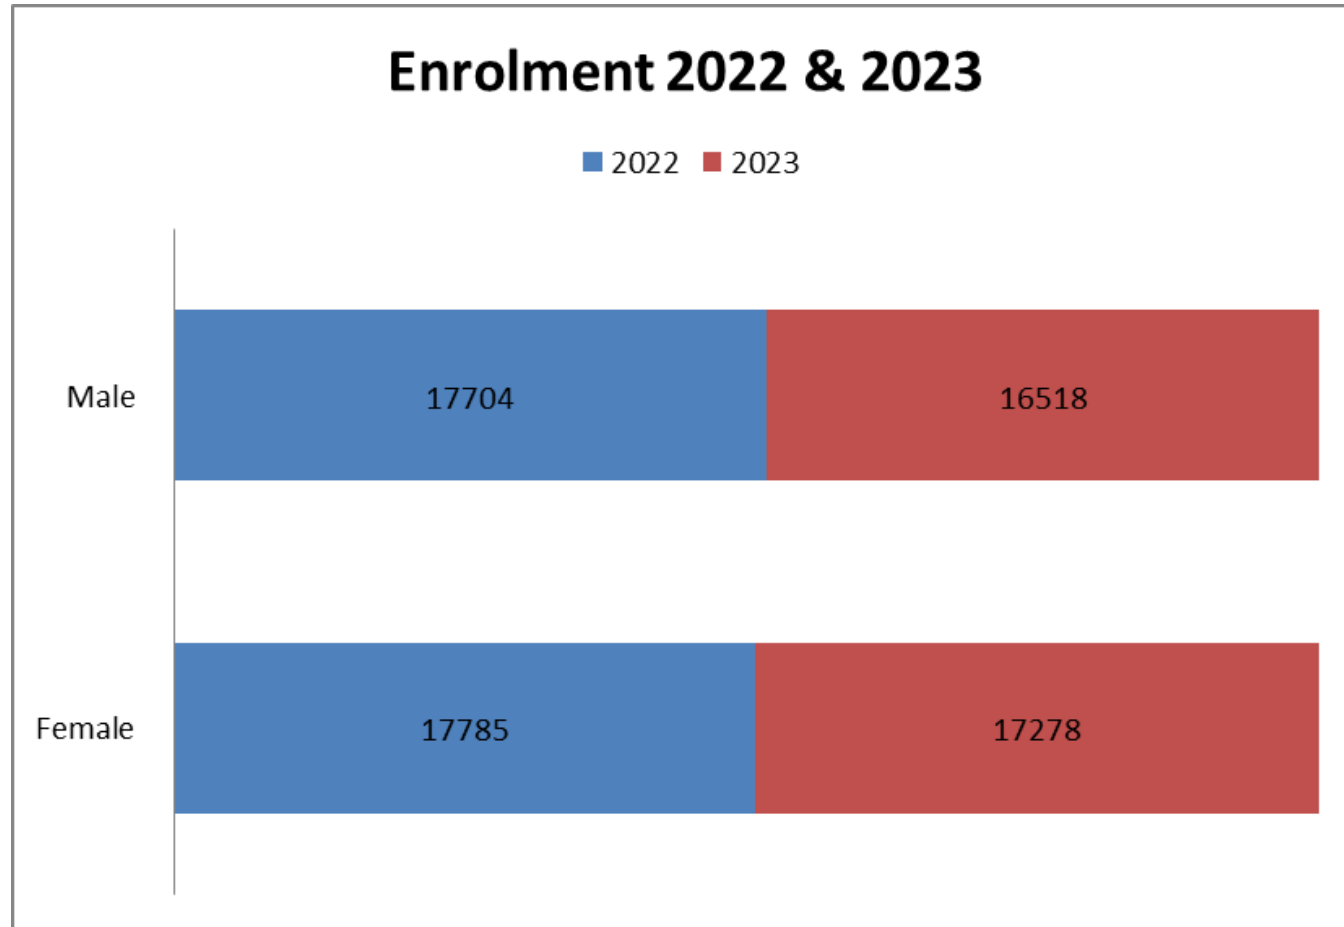

03

- Technical High School (grades 7-13)

# STUDENT ENROLMENT IN JAMAICA

# STUDENT REPEATERS IN JAMAICA

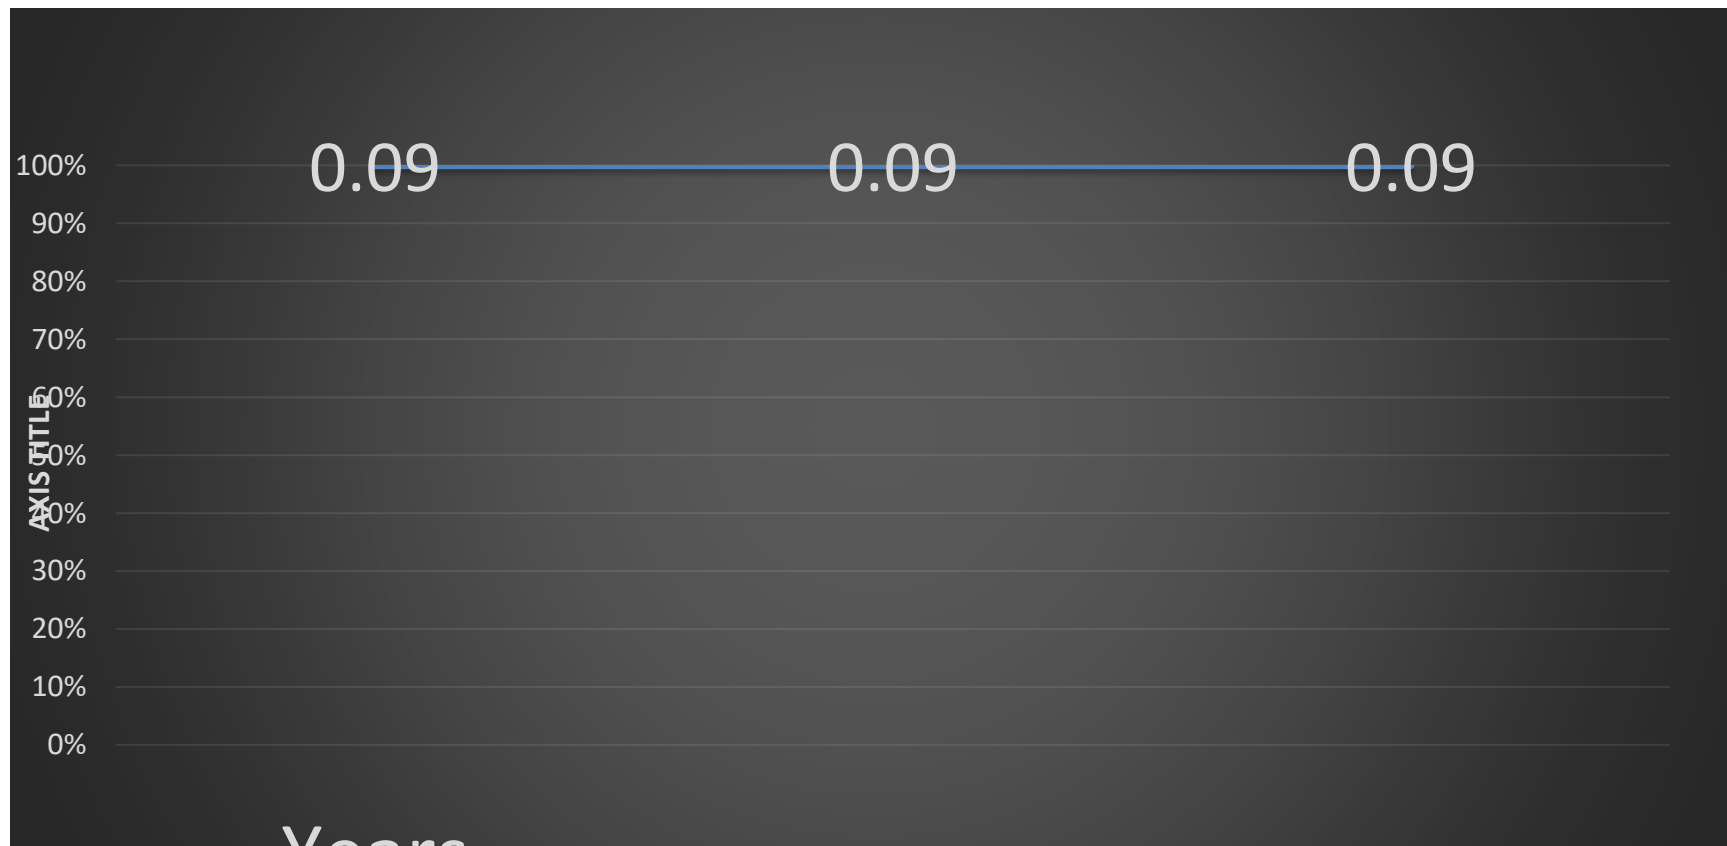

**STUDENT REPEATERS BY GENDER  
2022/2023**

	2022	2023
Repeaters Male	718	700
Repeaters Female	449	400

## THREE YEAR TREND OF JAMAICA'S GENDER GAP AT THE UPPER SECONDARY LEVEL

# Challenges

1. Dropout of students at the secondary level
2. More males are repeating terminal grades
3. Fewer males are transitioning to tertiary level
4. Girls are outperforming boys in external exams
5. Migration of our teachers

## KEY ACTIVITIES THE GOVERNMENT IMPLEMENTED TO ACHIEVE A MORE EQUAL AND ACCESSIBLE EDUCATION

- Reclassification of the All Age and Primary and Junior High Schools
- Elimination of the shift system and the expansion of classrooms to address issues with overcrowding in schools.
- Sixth Form Pathway Programme (2 years at secondary schools to allow students to be better prepared to move to next level
- Efforts to introduce ICT in the teaching and learning environment
- Provision of nutritional support (meals and nutrition snacks) to improve school attendance and enhancing the learning capacity of students
- The new National Standards Curriculum (NSC) to improve the general academic performance, attitude and behaviour of students but is also focused on the integration of STEM/STEAM at all levels through project-based and problem-solving learning

# Bridging accountability for Gender Equality in Education (AGEE): An innovative initiative

Presentation to engagement day: *Data driven approaches to lifelong learning*

Tuesday 6 February 2024

UNESCO, Paris

# The AGEE Project: Making gender equality in and through education count

# The problem with gender parity as a measure of education access, quality and concerns with intersecting inequalities

- Necessary, but not sufficient
- The many and contested meanings of gender and education
- Do we measure what works, what matters, or some connection?
- Why do we measure?
- How do we listen to subaltern voices?

Unterhalter, E. (2017) (Ed) *Measuring the Unmeasurable in Education*. Abingdon: Taylor and Francis

Unterhalter, E. (2023) 'The answer to everything? Four framings of girls' schooling and gender equality in education' *Comparative Education* 59, 2 , 145-168.

Longlands, H., Peppin Vaughan, R. and Unterhalter, E. (2024) 'Gender, missing data and SDG 4' in Delprato, M and Shepherd, D. (Eds.) *Missing education data and the SDG data regime*. Cheltenham: Edward Elgar, 138-156.

# AGEE project phases, 2015-2027

- **Phase 1:** Preliminary conceptual & technical work, literature reviews, discussions with UNESCO; participatory discussions in Malawi, South Africa, and internationally; development of draft AGEE Framework and dashboard
- **Phase 2:** Critical discussions, refinement of AGEE Framework with practitioners, policymakers and researchers, launch AGEE website, developing approach to selecting indicators for AGEE dashboards
- **Phase 3 (in progress):** Cross-national dashboard, development of composite index, work on criteria, shortlist for indicators in each domain of the AGEE dashboard, exploratory work on indicators for dashboards in different settings (national, local, project, institutional)
- **Phase 4 (due to begin):** Work in Malawi and with UNESCO offices in Kenya and Indonesia aims to address some of the disconnections between global, national and local data collection and analysis processes, auditing existing data, identifying missing data, using participatory processes to consult on and trial collection of and analysis of new data

# AGEE Framework

Resources

Values

Opportunities

Participation in  
Education

Knowledge,  
Understanding  
and Skills

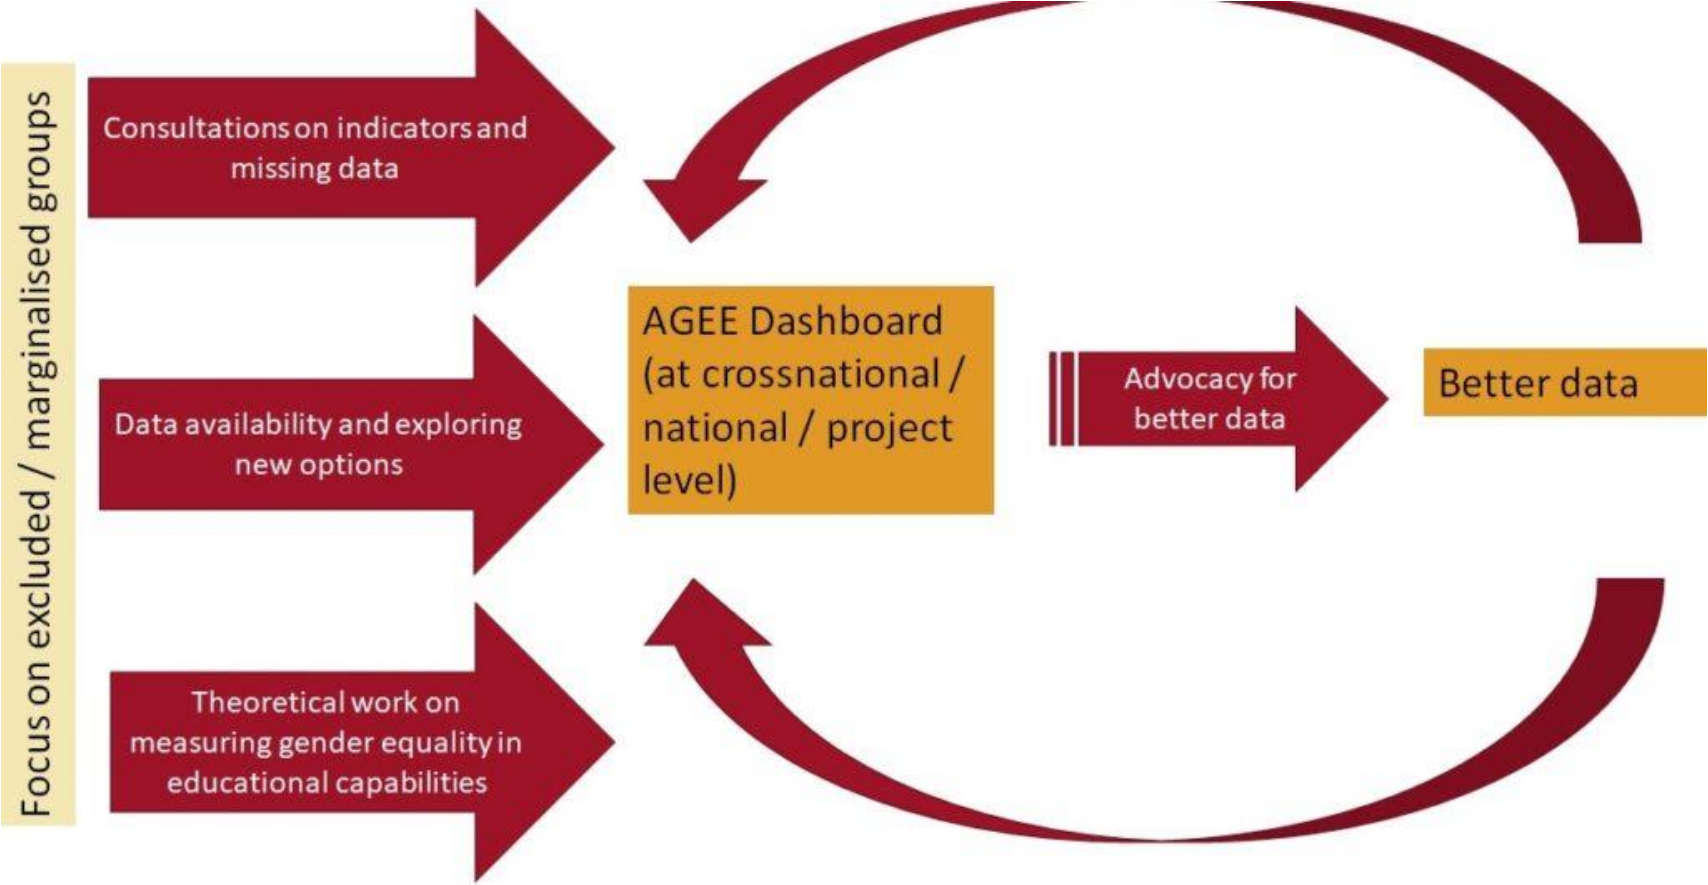

Outcomes

# The AGEE dashboard: theory and practice

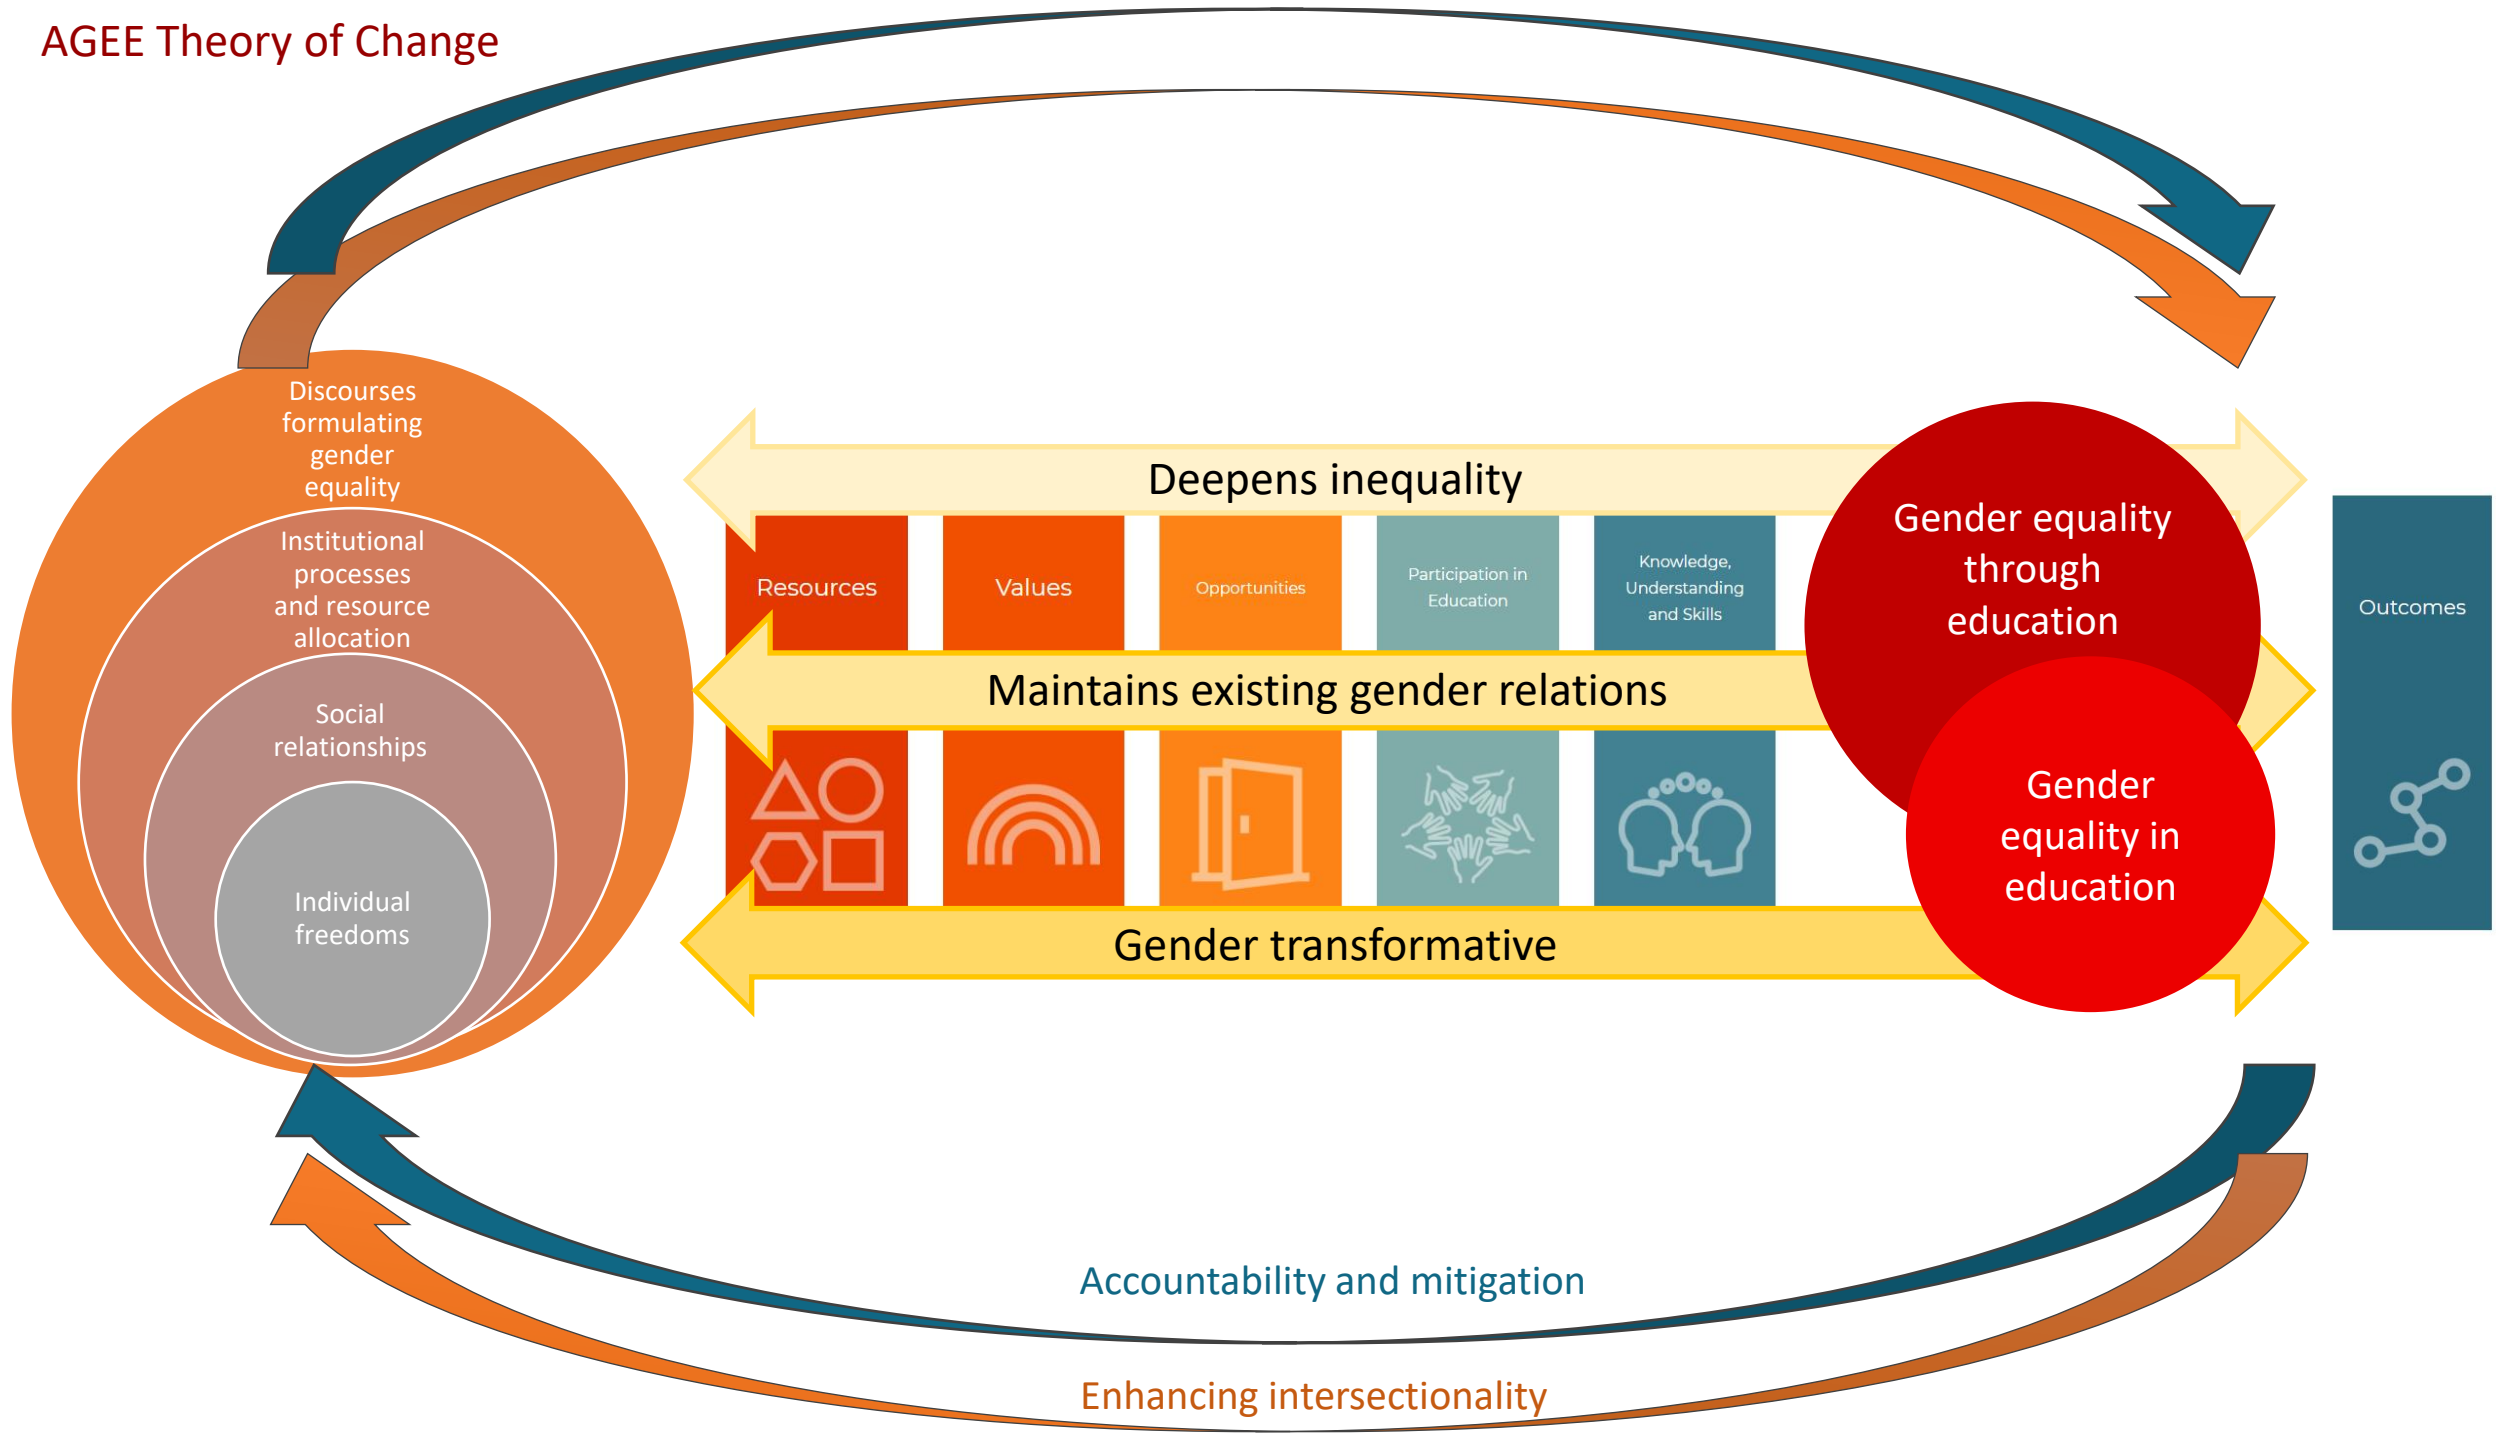

- Conceptual process:
  - Capability Approach: definition of gender equality of capabilities in and through education
  - Identifying 6 domains of gender inequalities in education (theoretical work, and deep insights from consultations at national and local levels)
- Developing criteria for selecting indicators for cross-national dashboard (literature review and consultations)
- Selection of indicators: mapping and auditing cross-national data sources (including SDG indicators, education data, household and other international surveys); further consultations

***AGEE as a process working to identify and plan for richer sources of data, thinking about consultation, scale and transformation***

# AGEE Theory of Change

# Bridging AGEE (2024-2027)

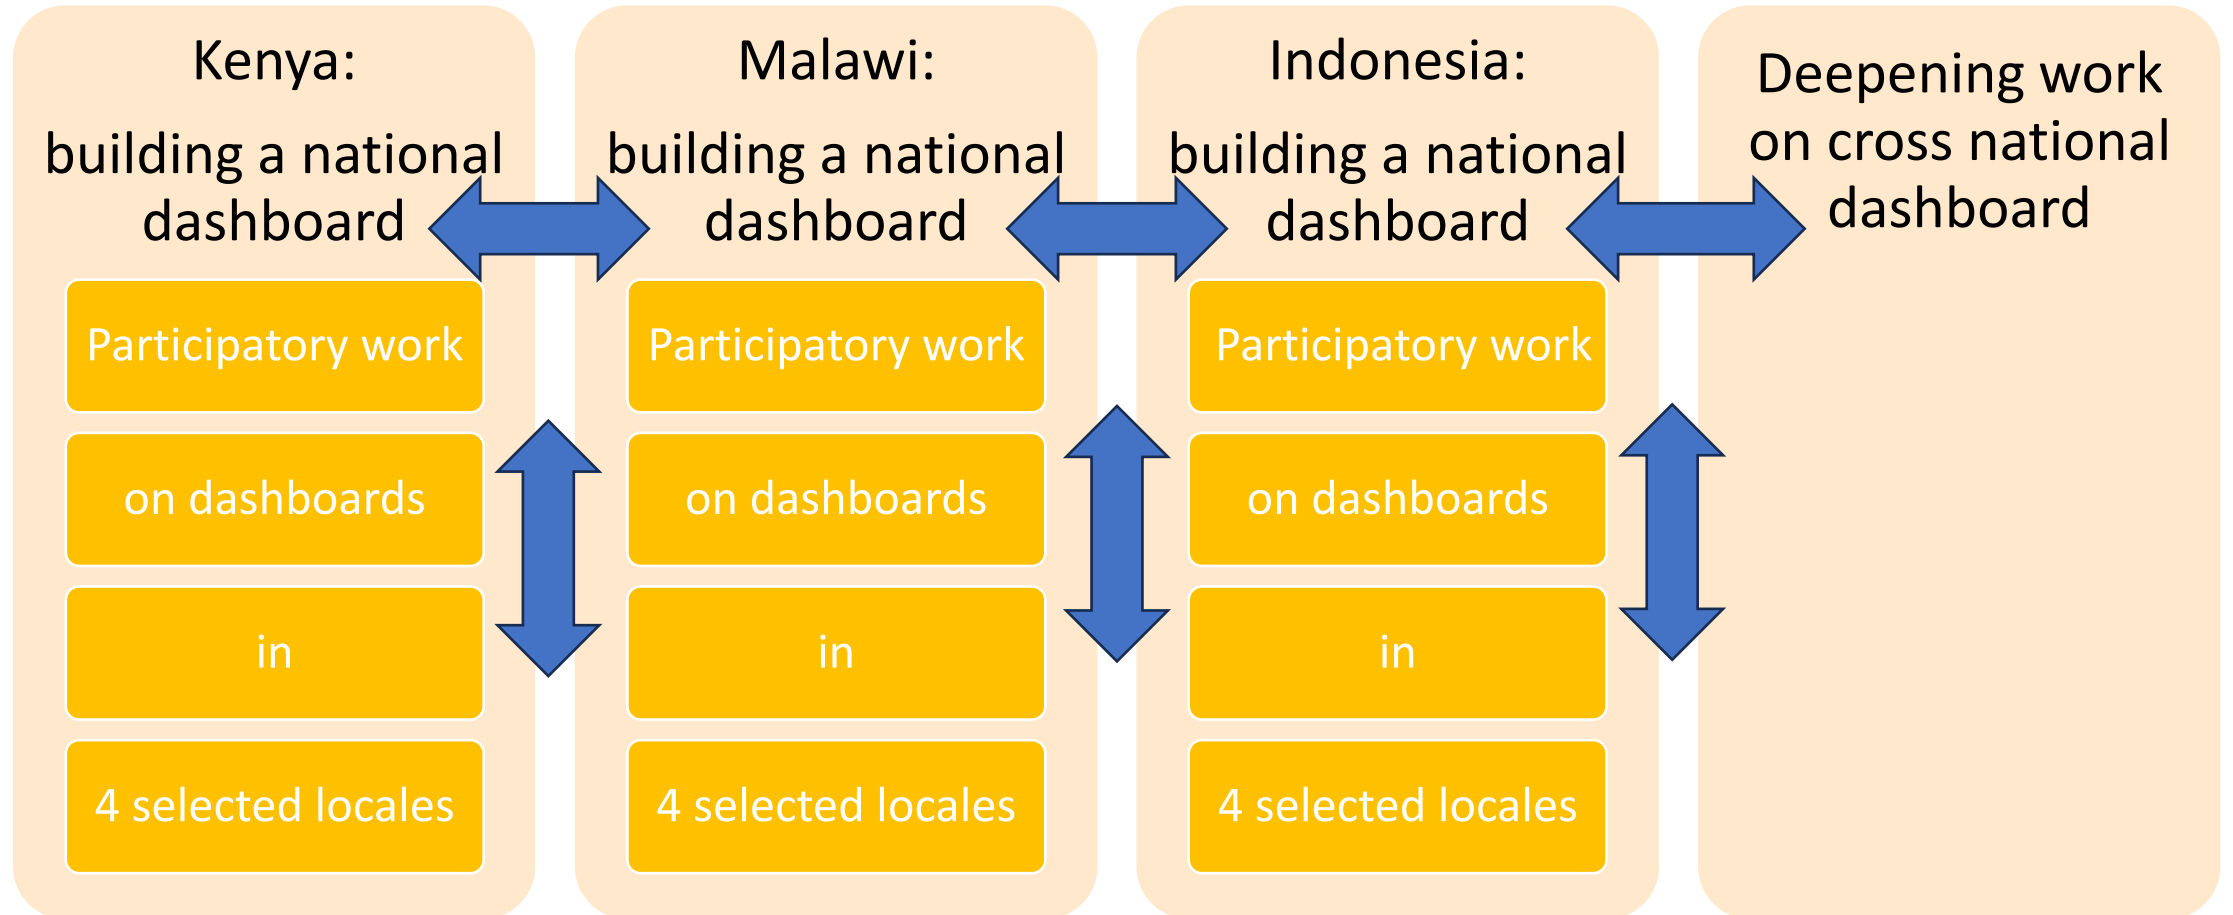

- Funded through KIX: A partnership between UCL, UNESCO and University of Malawi
- Project aims: to address some of the disconnections and lack of communication between different ways of thinking about gender, the groups who promote these approaches, and the practices associated with global, national and local processes for data generation and use in the area of gender, education and inclusion

# Objectives

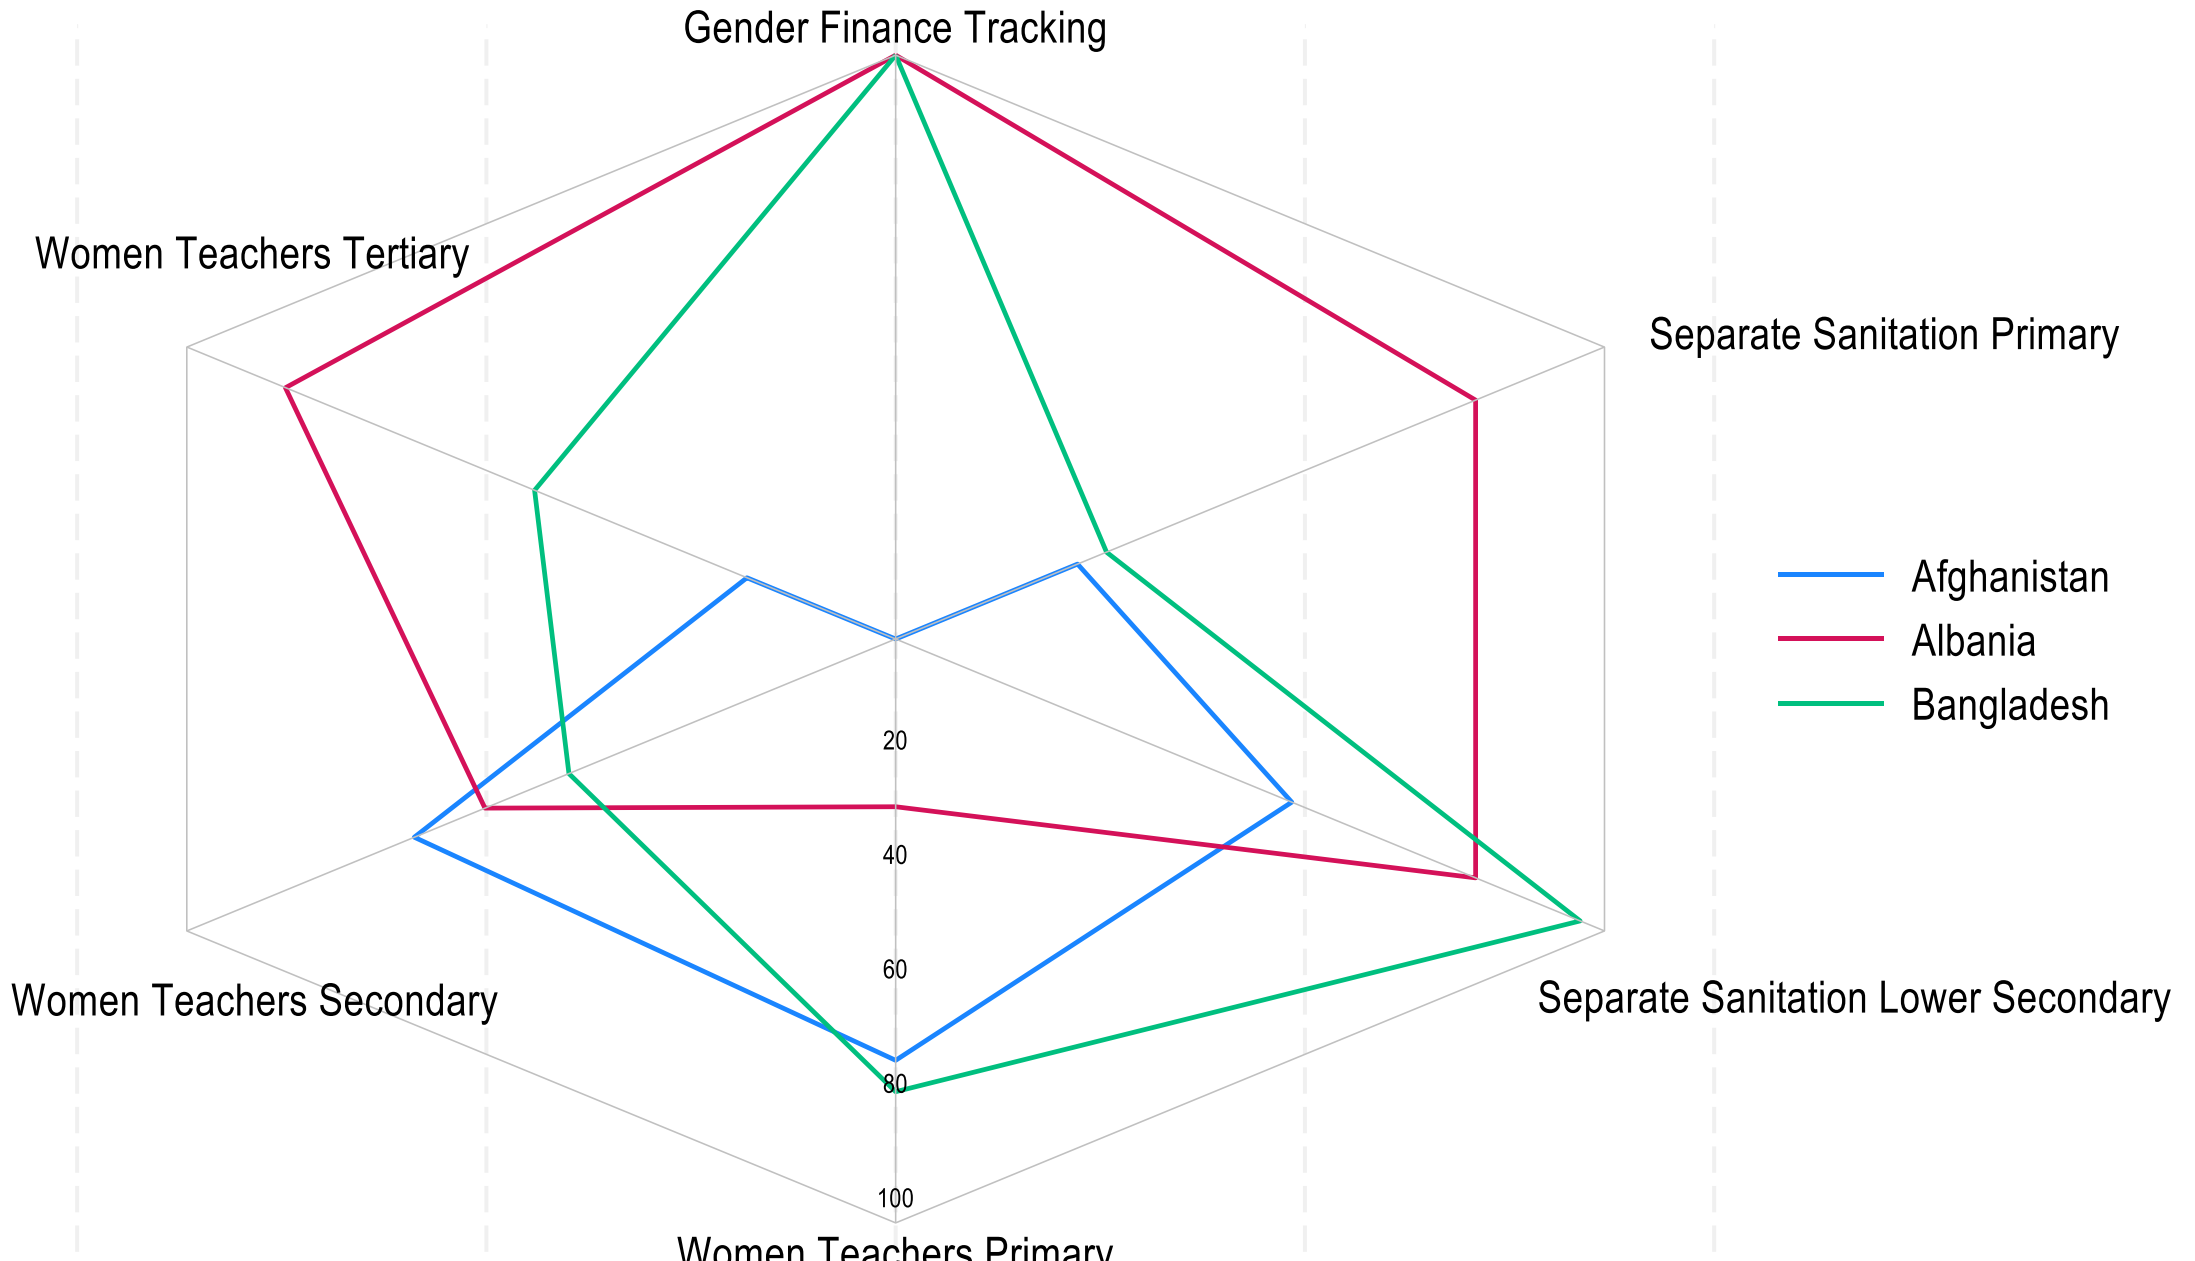

- Build knowledge concerning gender equality in and through education at local, national and global levels looking at **what data exists, what is missing and what is needed** to support insights on contextually specific and relevant processes
- Use new measurement tools and platforms (local, national and global) to build knowledge on **how to expand data systems and improve processes for data collection, uptake and critical reflection** regarding gender equality in and through education
- Through bridging local, national and global perspectives, **mobilise and share knowledge on equitable and inclusive processes** relating to the expansion of data systems and collection of new data on gender equality in and through education
- **Strengthen capacities** of those working in and with Education, Health and Social Development Ministries, and civil society organisations concerned with education, gender and women's rights **to identify strengths and weaknesses of existing data on gender issues in and through education and address the data gaps and systemic issues** that need to be changed to allow for data to support an enhancement of women's rights and gender justice.

COUNCIL

Ideas. Evidence. Impact.

# Platform Partners

BPW International

The Global Accountability Dashboard monitors progress against key indicators on gender-transformative education to propel transformative action on gender equality in and through education.

Data on country progress

Compiles data on over **10 indicators** drawn from the TES to Action on advancing gender equality and girls' and women's empowerment in and through education

Maps GTE programs

Documents over **700 organizations** and **950 programs** working in gender and education globally, nationally, and locally

Highlights GTE work

Highlights gender-transformative education initiatives implemented by governments worldwide

# GLOBAL ACCOUNTABILITY DASHBOARD

For gender equality and empowerment through education

The [Transforming Education Summit](#) (September 2022) was convened by the United Nations Secretary-General in response to a global crisis in education – one of equity and inclusion, quality and relevance. As one of the key outcomes of the Summit, leaders and education advocates launched the [Global Platform for Gender Equality and Girls' and Women's Empowerment in and through Education](#) through a landmark [Call to](#)

## Action areas monitored include:

Gender-transformative education sector plans, budgets, policies and data systems

Gender parity and non-discrimination

Gender-transformative curricula, teaching and learning materials, and pedagogies

Gender-transformative and inclusive learning spaces

Cross-sectoral collaboration and meaningful integration of young people in decision-making

Investments that target the most marginalized learners

## SEE COUNTRY PROFILES

### What are countries doing?

The link below brings you to country profiles that contain up-to-date statistics on gender and education in 133 low- and middle-income countries and 60 high-income countries.

# Key recommendations to support countries to get high-quality data on gender equality in and through education

## Meeting on Advancing gender equality in and through education through high-quality data

- As a follow up to the 2022 Transforming Education Summit, UNESCO and the Centre for Education and International Development at the University College London held a meeting on at UNESCO on October 23, 2023
- It brought together key initiatives and actors to discuss **how to best support governments** to make **informed decisions** based on high-quality data on gender equality in and through education
- Participants submitted **key recommendations** to support countries to get high-quality data on gender equality in and through education through a **pre-meeting survey** and **meeting discussion**

# The discussion resulted in the following recommendations

- 1. How to measure what matters:** Include the voice of all stakeholders, including girls, boys, non-binary children, teachers, CSOs particularly women's rights, gender justice and youth organizations, and researchers on what is important to measure on gender equality in and through education.
- 2. How to understand the problem:** Develop indicators beyond parity to consider the historical and contemporary gendered structures, relationships and norms that cause and perpetuate gender bias and inequalities in education policies, institutions, systems, curriculum, practices and experiences.
- 3. How to enable and collaborate:** Strengthen the capacities of education administrations, statistical offices, and civil society actors, together with education institutions, including in crisis contexts to share and evaluate knowledge, and collect, analyze and use quantitative and qualitative data on gender equality in and through education.
- 4. How to prepare the ground and sustain initiatives:** Understand the roots of backlash against gender equality in and through education and exchange good practice on how to best address it sustainably.
- 5. How to impact policy:** Strengthen the data-policy interface to ensure that policy makers undertake informed use of data on gender equality in and through education in their policies and programmes.
- 6. How to prepare for the future:** Apply gender-transformative approaches to the collection and use of education data, including intersectionality and an appraisal of current injustices, using principles of feminist data and evidence to provide a holistic picture of today and an assessment for future decades to contribute to post-2030 global agendas.
